

ERRECI

architecture

# MISSION

Erreci Architecture designs, manufactures and installs very high-performance designer steel windows and doors. It produces and installs made-to-measure windows and doors, compositions of all kinds and sizes to provide tailor-made solutions. Slim profiles and minimal profiles to leave space for light while guaranteeing high-performance safety, thermal insulation and quality.

Do you want to discuss a project? Contact our offices for information and book an appointment with our experts.

# MANUFACTURING &PRODUCTION PROCESSES

With Erreci Architecture, tradition and innovation find a connection: attention to detail and craftsmanship are combined with the continuous search for increasingly evolved options both in terms of design, production processes and safety.
We work with the best partners and suppliers on the market to make window, door, façade, folding and sliding systems that meet all requirements in terms of space and opening/closing, and fit harmoniously in any context, whether contemporary or historical. The Erreci Architecture team installs any type of glazing to state-of-the-art standards, i.e. keeping the thermal and acoustic insulation features of the frame intact through impeccable installation.
